## **Green energy sales seen quadrupling in decade**

Mon Mar 6, 2006 2:25 PM ET

By Timothy Gardner

NEW YORK, March 6 (Reuters) –

....

String ribbon solar technology made by Evergreen Solar (ESLR.O: [Quote](#), [Profile](#), [Research](#)) and thin film solar made by private companies Miasole, Heliovolt and Nanosolar all use less silicon.

Shares in clean energy companies are doing well this year. The PowerShares clean energy portfolio (PBW.A: [Quote](#), [Profile](#), [Research](#)) was trading slightly down at \$20.45 per share on Monday. But it's up nearly 25 percent on the year and near a 52-week high of \$21.05 hit last month.
